## SYNWOOD PVC FOAM SHEET

Synwood is the synthetic wood which is made by foaming of PVC by using ultra high end technology into different forms for various applications. It is 100% recyclable. Synwood is formed by the process of foam extrusion methods. The introduction of twin screw extrusion is a significant achievement for Synwood productions and others Sheet products.

### INTERIOR RANGE HC FOAM SHEET

#### Synwood v/s Plywood

	Synwood	Plywood
Water Proof	Yes	No
Anti-Corrosion	Yes	No
Cracking	No	Yes
Exterior use	No	Yes
Printable	Yes	No
Termite Resistant	Yes	No
Surface	Smooth	Rough
Eco-Friendly	Yes	No
Life Span	Long Life	4 to 5 years
Impact Resistance	High	Medium

### Advantages of PVC

- 1). Rigid PVC has good tensile, flexural, compressive, and impact resistance. And it can be used as a structural material alone. The softness, elongation at break, and cold resistance of soft PVC will increase. But the brittleness, hardness, and tensile strength will decrease.
- 2). PVC has good electrical insulation properties, can be used as low-frequency insulation material. Due to the poor thermal stability of PVC, long-term heating will cause decomposition, and make polyvinyl chloride discolor. So its application range is narrow, and the use temperature is generally between -15 and 55 degrees.

## FEATURES

- Corrosion Resistance
- Fire Retardant
- Light Weight
- Splinter Free
- Environment Eco- Friendly
- Printable
- Speedy Installation
- Termite & Pest Proof
- High Impact Strength
- No Shrinkage
- High Screw Holding Capacity
- Maintenance Free
- Non – Toxic
- Aesthetic Look
- Paintable
- Water Proof
- Chemical Resistance

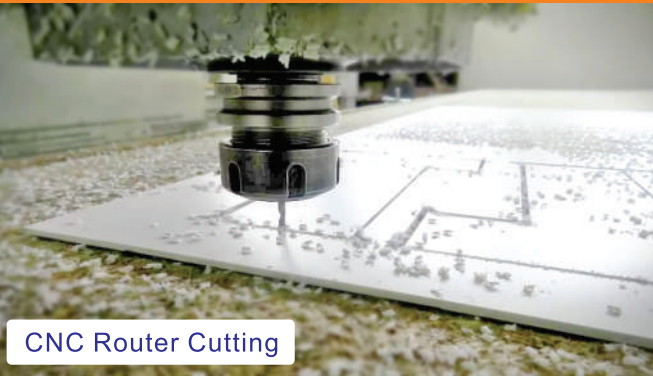

**LOOKS LIKE WOOD, FEELS LIKE WOOD & LASTS LONGER THAN WOOD**

- Screws to use
- Cutting
- Nailing
- Drilling
- Painting
- Gluing
- Routing
